

# PRO-GUARD

## BAR SCREEN

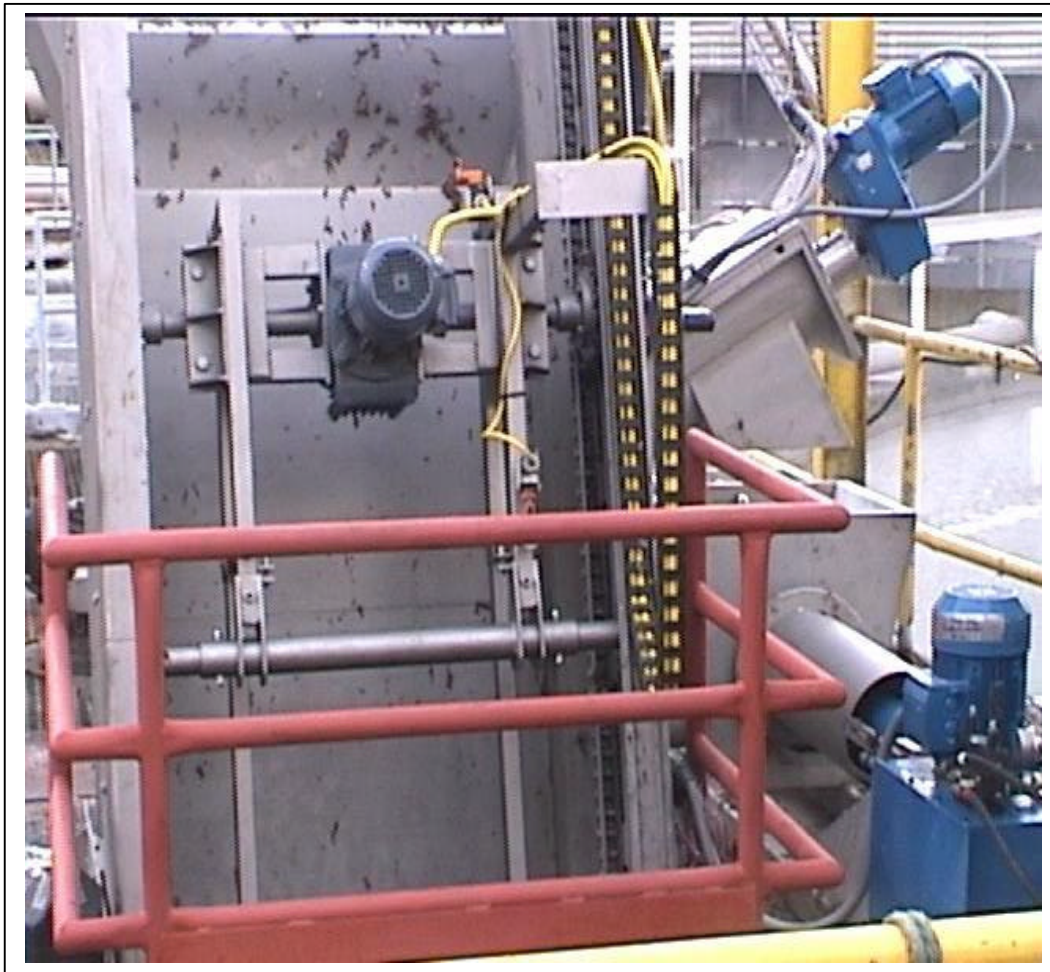

### COGWHEEL CLIMBING PIN-RACK TYPE

The PRO-Equipment Cogwheel Climbing Pin-Rack Bar Screen, Model GT-PR, is a heavy-duty screen designed to operate under the most extreme conditions. The high capacity rake enters the bar rake from the upstream side, lifts screenings and discharges them at operation floor level, either into a conveyor or a container.

PRO-Equipment, Inc. offers typical sizes of Cogwheel Climbing Pin-Rack Bar Screens for the following channel dimensions:

Channel width (W): from 4' to over 30'

Channel depth (H): from 3' to over 50'

The PRO-Equipment, Inc. Cogwheel Climbing Pin-Rack Bar Screen can be designed for installations to operate either inclined or vertically. Typical angles of inclination are 70°, 75°, 80°, and 90°. Other sizes or inclination angles can also be provided upon request.
